

# Kalyan Madanapalli

kalyan19@vt.edu | 703-625-0923 | github.com/kalyan19

## Education

---

### Georgia Institute of Technology

- Program: Master of Science in Computer Science
- Specialization: Machine Learning

### Virginia Polytechnic Institute and State University

- Major: Computer Science (BS)
- Cumulative GPA: 3.62 / 4

## Skills

---

- **Languages:**
  - Java (proficient), Python (proficient), C (familiar), C++ (prior experience), Perl (prior experience), JavaScript (prior experience), HTML (prior experience)
- **Software, Frameworks, and Tools:**
  - PostgreSQL, Redis, Spring, Hibernate, REST, Storm, OpenStack, OpenCV, TensorFlow, MATLAB, ROS, PreScan, Android Studio, Google Firebase, Jenkins, Maven, Puppet, Splunk, Camel, Kafka, JIRA, Git

## Work Experience

---

<b>Software Developer at Solers, Inc</b>	<ul style="list-style-type: none"><li>• Working with processing satellite and sensor data in the backend</li><li>• Worked with astrophysics algorithms such as propagating satellite orbits in time</li><li>• Created data models with Hibernate and saved into Postgres database</li><li>• Wrote REST calls to retrieve information from database</li><li>• Worked with image processing pipeline for sensor data</li></ul>	June 2018 to Present
<b>Co-op at Solers, Inc</b>	<ul style="list-style-type: none"><li>• Added features such as user roles and workflows for Request Tracker (virtual help desk application)</li><li>• Created a puppet module to deploy a fully configured Request Tracker to cloud instances (in Open Stack)</li><li>• Created and packaged a Splunk app with all preexisting dashboards</li></ul>	Summer, Fall 2017
<b>CS Molecular Dynamics Research</b>	<ul style="list-style-type: none"><li>• Worked with visual molecular software like VMD, Pymol</li><li>• Created a short molecular movie of the interactions of a specific nucleosome</li><li>• Developed a VMD plugin that displays additional information regarding the residue selected in VMD</li></ul>	Summer 2017
<b>CS 2505 Teaching Assistant</b>	<ul style="list-style-type: none"><li>• Helped students in the course CS 2505 (intro to C/Unix) with homework and relevant coursework</li><li>• Held weekly office hours where 4-8 students would come for help</li></ul>	Spring 2017

## Projects

---

<b>Face Detection with Neural Network</b>	<ul style="list-style-type: none"><li>• Created and trained a convolutional neural network to classify faces given a 128x128 pixel image with a 2000+ image dataset</li><li>• Written in python using TensorFlow library</li></ul>	Summer 2018
<b>AutoDrive Challenge</b>	<ul style="list-style-type: none"><li>• 3 year competition to develop an autonomous vehicle to navigate an urban driving course</li><li>• Developed a camera-based stop sign detection node in ROS</li><li>• Worked with modeling sensors like LiDar in PreScan</li></ul>	Fall 2017, Spring 2018
<b>TA Tips</b>	<ul style="list-style-type: none"><li>• Mobile android app meant to connect students with students for tutoring each other</li></ul>	Spring, Summer 2017
